THE WASHINGTON QUARTERLY

I PROVOCATIONS

3 How To End Hunger ■ Josette Sheeran

The executive director of the UN World Food Programme maintains that the battle against global hunger vulnerability is winnable today, more than ever before. The global community knows how by developing antihunger strategies with three common elements.

17 The Other Side of the COIN: Perils of Premature Evacuation from Iraq ■ Kenneth M. Pollack and Irena L. Sargsyan

The United States is leaving Iraq, but *how* it leaves is tremendously important. The authors draw lessons from recent history around the world to foresee the risks, namely civil war resuming or problems between the Iraqi military and civilian government arising, and how to minimize them.

33 Afghanistan: Building the Missing Link in the Modern Silk Road ■ Andrew C. Kuchins, Thomas M. Sanderson, and David A. Gordon

The Northern Distribution Network, transit corridors developed by the United States to deliver nonlethal goods to its forces in Afghanistan, could provide the missing link in a unified trade and transport system—the Modern Silk Road—that would enhance Eurasian prosperity and security for all.

49 **Why Doesn't Russia Join the WTO?** ■ *Anders Åslund*

To join the World Trade Organization is a strategic choice for Moscow. Putin strongly supported entry in his first term, but lost interest in his second. Now, Russia's accession bid has primarily become a litmus test of relative power between Putin and Medvedev.

65 **Reforming the Euro-Atlantic Security Architecture: An Opportunity for U.S. Leadership** ■ *Jeffrey Mankoff*

The United States should take a more active interest in the Russian proposal for a new Euro-Atlantic security agreement, and work closely with its European allies to fill in the details. Even beginning to discuss possible arrangements can benefit all involved.

85 **Detecting and Disrupting Illicit Nuclear Trade after A.Q. Khan** ■ *David Albright, Paul Brannan, and Andrea Scheel Stricker*

For most states, and certainly for terrorists, the pathway to obtaining or improving nuclear weapons remains through illicit nuclear trade. The first lines of defense against this threat are currently inadequate but can, and should, be bolstered in three ways.

107 **The Security Costs of Energy Independence** ■ *Gregory D. Miller*

The United States should reduce its dependence on foreign oil, but dramatically doing so will have three major unintended security consequences. How can the United States and all developed states mitigate these dangers?

121 **Global Debates on Global Zero**

123 **Picture the Problem: Toward a Nuclear-Weapons-Free World: What Will It Take?**

125 **The Illogic of Zero** ■ *Bruno Tertrais*

The number of, and reliance on, nuclear weapons should be reduced, but the intellectual and political movement in favor of abolition suffers from unconvincing rationales, inherent contradictions, and unrealistic expectations. A nuclear-free world is an illogical goal.

139 **China's Perspective on a Nuclear-Free World** ■ *Hui Zhang*

Beijing believes that all nuclear states should adopt a no-first-use policy and redefine the role of nuclear weapons in their national security doctrines. Although China stands ready to support the nuclear-free agenda, it is up to the two countries with the overwhelming number of the world's warheads to take the lead.

157 **Global Zero: An Israeli Vision of Realistic Idealism** ■ *Ariel E. Levite*

Israel's approach toward a nuclear-free world is bound to remain fully sympathetic to the vision, agnostic about its prospects, and hard-nosed realist about the process leading to its realization.

169 **Bringing India's Dream to Fruition** ■ *T.P. Sreenivasan*

The vision of a nuclear-free world is shared by most countries, but the way forward is far from clear. The first requirement is to recognize the antiquated nature of the Nuclear Non-Proliferation Treaty and to shift the paradigm away from relying on the treaty.

181 **On Washington**

183 **Preparing for the Worst: Democrats' Fears of the 2010 Midterm Elections** ■ *Charles E. Cook, Jr.*

Independents are growing increasingly concerned that Obama's view of the role of government may be different and more expansive than theirs, helping trap the administration in a vise-like grip between two large groups, and throw the House up for grabs in 2010.
