

The U.S. Generalized System of Preferences (GSP) Program

Congress created the U.S. GSP program in 1974, with broad bipartisan support, to expand the choices of American industry and consumers while creating economic opportunities in developing countries. The GSP program provides preferential duty-free treatment for 3,400 products from 134 designated beneficiary developing countries (BDCs) and territories. In 1996, an additional 1,450 articles from least-developed beneficiary developing countries (LDBDCs) were made eligible for duty-free treatment. There are currently 43 least-developed GSP beneficiaries. U.S. imports under GSP in 2006 from all beneficiaries totaled \$32.6 billion, an increase of 22 percent over 2005.

The combined GSP-eligible product lists include most dutiable manufactures and semi-manufactures, and certain agricultural, fishery, and primary industrial products. Top U.S. imports under GSP in 2006 were petroleum, gold jewelry, aluminum alloy products, refined copper cathodes, methanol, and silver jewelry. U.S. imports from Mongolia in 2006 included tungsten concentrates, plastic hangars, plastic household and toilet articles, plastic articles of apparel and clothing accessories, and fur headgear.

Some articles are prohibited by the GSP statute from receiving GSP treatment, including textiles produced with cotton, wool, manmade fiber, other vegetable fiber (linen and ramie); watches; certain footwear and handbags; luggage; flat goods not made of silk; work gloves; and other leather items.

How does an import receive GSP duty-free treatment?

A GSP-eligible import must meet the following requirements:

- It must be included in the list of GSP-eligible articles.¹
- It must be imported into the United States directly from the GSP beneficiary or pass through another country in a sealed container.
- The article must be the growth, product, or manufacture of the GSP beneficiary.
- When product inputs are imported from outside of the GSP beneficiary country, the sum of the cost or value of materials produced in the beneficiary country, plus the direct costs of processing, must equal at least 35 percent of the product's appraised value when the product is sold for export into the United States. Imported materials can be counted toward the 35 percent value-added requirement only if they are "substantially transformed" into new and different constituent materials which are then used to produce or manufacture the eligible article to be exported. "Substantially transformed" means that U.S. customs would classify the constituent materials as different items. (see Attachment C)
- The exporter/importer must request duty-free treatment under GSP by placing an "A," "A+," or "A*" before the U.S. tariff line (HTSUS) number that identifies the imported article on the customs entry form. (See Attachment B)

¹ The Harmonized Tariff System of the United States is available at www.usitc.gov/tata/hts. Published classification rulings are available at <http://rulings.cbp.gov>. Additional information about customs procedures and importing into the United States is available at www.cbp.gov.

Statutory competitive need limitations

Competitive need limitations (CNLs) provide a ceiling on GSP benefits for each product and beneficiary country. A beneficiary country will automatically lose its GSP eligibility with respect to a product if the CNLs are exceeded and if no waiver is granted. All CNLs, however, are automatically waived for GSP beneficiaries designated as LDBDCs.

Inputs from GSP beneficiaries in regional associations can pool inputs

The GSP program contains special provisions for beneficiary developing countries that are members of a regional association. The regional association is considered as one country for purposes of GSP rules of origin. Articles produced in two or more eligible member countries of an association will be accorded duty-free treatment if the countries, together, meet the rules of origin. A least-developed beneficiary in a recognized regional association can also work with a non-least developed beneficiary country in the regional association to produce one of the 1400 products reserved for production by least-developed beneficiaries. The product will received GSP duty-free treatment as long as it is shipped directly to the United States from the least-developed country.

GSP certified textile handicraft arrangements

Thirteen GSP beneficiary countries can also export several certified handicraft items duty-free under GSP because the countries have “certified textile handicraft arrangements” with the United States. The agreement allows the United States to give duty-free treatment to U.S. imports, that have been certified by the beneficiary country, of hand-loomed and folklore wall hangings; hand-loomed and folklore pillow covers; and certain hand-woven textile floor coverings. Duties saved range from 3.8 percent to 4.3 percent.

Snapshot of Mongolia’s Economy

Overall

Economic activity in Mongolia has traditionally been based on herding and agriculture. The main agricultural products are wheat, barley, vegetables, forage crops; sheep, goats, cattle, camels, and horses.

Mongolia also has extensive mineral deposits. Copper, coal, molybdenum, tin, tungsten and gold account for a large part of industrial production. The main industries are construction and construction materials; mining (coal, copper, molybdenum, fluorspar, tin, tungsten, and gold); oil; food and beverages; processing of animal products, cashmere and natural fiber manufacturing.

Mongolia’s main export commodities in 2005 were copper, apparel, livestock, animal products, cashmere, wool, hides, fluorspar and other nonferrous metals. The major export markets in 2005

were China (48.1 percent), United States (14.2 percent), Canada (11.6 percent), United Kingdom (8.3 percent) and South Korea (6.2 percent).

Mongolia's main import commodities in 2005 were machinery and equipment, fuel, cars, food products, industrial consumer goods, chemicals, building materials, sugar and tea. The major import source countries for 2005 were Russia (34.5 percent), China (27.4 percent), Japan (7.1 percent), and South Korea (5.3 percent).

GSP

Mongolia became an eligible developing country beneficiary of the GSP program in 1999. U.S. imports from Mongolia under GSP have been increasing. U.S. imports from Mongolia under GSP were \$161,915 in 2005 and \$530,116 in 2006, an increase of 227.4 percent. GSP imports from Mongolia account for about 0.5 percent of all U.S. imports from the country. Mongolia is also a beneficiary of other GSP programs, including those of the European Union (EU), Japan, and New Zealand.

Opportunities for Increasing Mongolia's Use of GSP Duty-Free Benefits

- Ensure that the entry forms of all GSP-eligible products are properly marked with an A or A*, according to the Harmonized Tariff Code of the United States (HTSUS) so that unnecessary duties are not paid for GSP-eligible exports from Mongolia. (see Attachment B)
- Identify and increase exports of GSP-eligible textile and apparel products.
- Identify what Mongolia is exporting to other countries under their GSP programs (e.g., the European Union and Japan, which present similar shipping challenges) to see if those products could be exported to the United States and receive U.S. duty-free treatment.
- Determine potential mineral exports that are GSP eligible.
- Research Mongolia's competitive exports on a global basis and determine which are GSP-eligible.
- Conclude a certified textile handicraft arrangement with the United States so that certain dutiable carpets, wall-hangings, and pillow covers can enter duty-free.

U.S. Imports from Mongolia under the GSP Program

- U.S. imports from Mongolia under GSP in 2006 were \$530,116, accounting for only 0.5 percent of overall U.S. imports from Mongolia. This is more than double the 2005 figures, with full-year U.S. GSP imports from Mongolia at \$161,915, or 0.1 percent of overall U.S. imports from Mongolia.
- U.S. imports in GSP-eligible lines increased from \$374,587 in 2005 to \$912,435 in 2006, a 143.6 percent increase.
- Mongolia's utilization for 2006 was 58.1 percent, an increase over its 2005 rate of 43.2 percent, but below the global 2005 GSP utilization rate average of 71 percent.
- Top U.S. imports under GSP from Mongolia in terms of dollar value during 2006 included tungsten concentrates, and plastic hangers, household, and apparel accessories. (See expanded list of top imports and complete list of GSP imports below.)

GSP-eligible products from Mongolia for which the benefit was not claimed:

Approximately \$382,319 in U.S. imports from Mongolia were eligible for duty-free entry under GSP, but were not claimed under the GSP program during 2006. Over \$154,000 of articles of plastic were imported under tariff rates lines under which other imports claimed GSP benefits, GSP utilization rates for these plastic products are as low as 21.6 percent. Other products had utilization rates of zero percent, indicating a significant lost opportunity to claim GSP benefits.

One reason for not claiming GSP duty-free treatment may have been because the import did not meet the GSP rule-of-origin requirements. Assuming that the imports did meet the requirements, the rates of duty paid unnecessarily ranged from 1.5 percent for static converters (HTS 85044095) to 7 percent for national flags (HTS 63079098).

The following chart shows GSP eligible imports from Mongolia for the last three years for which no preference was claimed.

HTS8	DESCRIPTION	Program	YR 2004	YR 2005	YR 2006	MFN RATE
12099180	Vegetable seeds, nesi, of a kind used for sowing	No program claimed	113,139	0	0	1.5 cents/kg

Increase Exports of GSP-eligible Textile and Apparel Articles (see Attachment A for complete list)

Increase GSP-eligible textile and apparel exports: cashmere

- 51031000: Noils of wool or of fine animal hair (0.4%)
- 51032000: Other waste of wool or of fine animal hair, (2.6 cents per kg)
- 57025120: Floor coverings (hand-woven and not of pile construction) (4.3%)
- 57031020: Tufted hand-hooked carpets & other floor coverings of wool or fine animal hair (6%)
- 51161008: Sports gloves, mitts, and mittens (2.8%)
- 63049940: Certified hand-loomed and folklore wall hangings of wool or fine animal hair
- 63049910: Certified hand-loomed and folklore pillow covers of wool or fine animal hair
- 65069900: Headgear of materials other than rubber, plastics, or furskins, whether or not lined or trimmed

Increase GSP-eligible textile and apparel exports: fur

- 65010060: Hat forms, bodies and hoods of fur felt for women or girls
- 65069200: Headgear of furskin, whether or not lined or trimmed

These products would need, according to the HTSUS product description, to contain 70% or more of silk or silk waste, so technically could be blended with up to 30% or less cashmere:

- 61171040 Shawls, scarves, etc. knitted or crocheted, containing 70% or more by weight of silk or silk waste
- 61178085 Headbands, ponytail holders & similar articles, of textile materials other than containing 70% or more by weight of silk knitted or crocheted
- 62131010 Handkerchiefs, not knitted or crocheted, containing 70% or more by weight of silk or silk waste

- 62141010 Shawls, scarves, mufflers, mantillas, veils and the like, not knitted or crocheted, containing 70% or more by weight of silk or silk waste
- 62171085 Headbands, ponytail holders & similar articles, of textile materials other than containing less than 70% by weight of silk knitted or crocheted
- 62043960 Women's or girls' suit-type jackets and blazer, not knitted or crocheted, containing 70% or more by weight of silk or silk waste
- 62044910 Women's or girls' dresses, not knitted or crocheted, containing 70% or more by weight of silk or silk waste

Consider exporting industrial products to the U.S. duty-free under GSP

- Copper ores, concentrates, oxides, sulfate and products of copper
- Tungsten concentrates, oxides, products
- Ash and residues containing mainly zinc or tungsten
- Distillates of high-temperature coal tar
- Molybdenum: oxides, chemical mixtures, bars, rods, wires, planes, chisels
- Tin: chemicals, alloys, many products
- Gold: compounds and jewelry

Export Mongolia's competitive GSP-eligible products in the U.S. market

- Bovine and equine leather
- Copper ores and concentrates
- Gold in semi-manufactured forms
- Other minerals (earlier slide)
- Preserved meat and offal of bovine animals
- Raw hides and skins of bovine/equine animals
- Wool, not carded or combed
- "Food, beverages, and tobacco"

Potential U.S. Imports from Mongolia under GSP based on World, EU and Japan Imports from Mongolia

There are a number of potentially GSP-eligible tariff lines with relatively low (or non-existent) U.S. imports over the 2003-05 period but relatively strong EU and Japan imports from Mongolia (at least \$10,000 on an average annual basis) or world imports from Mongolia exceeding \$50,000. (See chart below.) Such products include soups and broths, silicon, certain cleaning agents, stearic acid, certain plastics (polymethyl methacrylate and polyethylene terephthalate, and other miscellaneous plastics articles), leather skins, furskins, wood products (doors, tableware, kitchenware, and other wood articles), wool and fine animal hair waste, certain synthetic fiber gloves, textile furnishing articles, disposable footwear, imitation jewelry, ferroalloys, taps, cocks, and valves, and storage batteries.

It should be noted that only HS 6-digit sectors with average AVE tariffs of 3 percent or higher were included in this list. In addition, certain HS6 sectors, such as those including synthetic fiber gloves, textile furnishing articles, and footwear, may include items that are not GSP-eligible and represent significant sensitivities vis-à-vis U.S. domestic manufacturers.

Certified Handicraft Arrangement

The arrangement allows the United States to give duty-free treatment to U.S. imports, that have been certified by the beneficiary country, of hand-loomed and folklore wall hangings (HTS 6304.99.10 (MFN rate: 3.8%)); hand-loomed and folklore pillow covers (HTS 6304.99.40 (MFN rate: 3.8%)); and a certain type of hand-loomed and folklore textile floor covering (HTS 5702.91.20 (MFN rate: 4.3%)).

Attachment C: Further Information on Rules of Origin

Examples of the Changes Required to Transform Foreign Raw Materials and Components into Articles that Qualify for Duty-Free Treatment Under GSP

1. Double-Substantial Transformation: Hand-Held Mini Vacuum Cleaner

Situation: Korean resin is imported into Mongolia to be made into a vacuum cleaner under U.S. Harmonized Tariff Schedule (HTS) provision 8509.10. The resin is injection-molded into a vacuum cleaner housing (1st transformation) and then assembled with other components into a complete vacuum cleaner (second transformation). The cost of the Korean resin is counted along with other value-added components in Mongolia to meet the GSP requirement that 35% of the value of the article is of Mongolian origin. That is because the Korean resin was changed into a completely different product in Mongolia twice: as a vacuum cleaner housing, then as a complete vacuum cleaner. This double transformation allows the resin to be counted and the products it was transformed into towards the value that is added in Mongolia.

Housing			Vacuum Cleaner Assembly		
Materials	Country of Origin	Cost	Materials	Country of Origin	Cost
Resin	Korea	\$2.00	Housing	Mongolia	\$2.45
Processing	Mongolia	<u>\$0.45</u>	Motor	China	\$4.00
			Accessories	China	\$2.00
Total		\$2.45	Processing	Mongolia	<u>\$3.00</u>
			Total		\$14.45

Conclusion: The assembled article (the vacuum cleaner) meets the 35% direct-cost-of-processing requirement because the value of the Mongolian inputs (including the Korean resin that is transformed twice) accounts for 38% of the total cost of production:

$$\$5.45/\$14.45 = 38\%$$

2. Double-Substantial Transformation: Umbrellas

Based on U.S. Customs and Border Protection (CBP) Ruling number HQ 555189, dated June 12, 1989:

Situation: Hand-held, collapsible umbrellas with telescopic shafts are manufactured in Mongolia from Mongolian and Chinese components. They have been determined to be eligible to benefit from GSP duty-free treatment.

Chinese Components	Mongolian Components
Collapsible metal umbrella frames	Cotton thread Packing cartons
Waterproof nylon fabric	Sewing labels Packing tape

Printed hang tags
Plastic umbrella cases

Snap buttons
Elastic bands

Packing strap
Packing clips

The CBP Ruling found that the manufacturing process involves two steps and that, based on the producer's cost data, the Mongolian content of the finished umbrella is equivalent to 36.2% of the umbrella's value. This meets the requirement that at least 35% of the cost of production of the article is of Mongolian origin in order to qualify for duty-free entry into the United States under GSP.

3. Product-of Requirement

Based on CBP Ruling number HQ 555999, dated November 20, 1991:

Situation: An imported product consisting of a collection of distinct articles is classified under a single HTS tariff line. The imported product can receive GSP duty-free treatment only if all of the items in the collection are considered "products of" Mongolia.

To illustrate the application of the "product of" requirement to sets of articles under GSP, we will use the example of a toy farm sets. The sets consist of snap-together plastic farm building parts produced in Mongolia and accessories which contain, among other things, a bag containing small plastic farm animals that were produced in China.

The total cost of producing the toy farm set is \$8.85 and the addition of profit brings the appraised value upon importation to \$9.85. \$1.75 of the \$9.85 is accounted for by third-country (Chinese) content.

Component	Country of Origin	Cost
-----	-----	-----
Labor	Mongolia	\$0.50
Building parts	Mongolia	\$3.85
Fence parts	Mongolia	\$0.60
Vehicles & equipment	Mongolia	\$2.15
Farm animals	China	\$1.75
-----	-----	-----
Subtotal (labor and parts)		\$8.85
Profit	Mongolia	\$1.00
-----	-----	-----

Appraised value upon importation into the U.S. \$9.85

The value added by direct processing in Mongolia (labor and parts) amounted to \$7.10, and accounted for 72% of the appraised value of the farm set. Although this far exceeded that GSP requirement that 35% of the value be of Mongolian origin, the farm set was determined not to be eligible for entry under GSP because an identifiable component, the farm animals, was not the "product of" Mongolia.

The farm animals (made in China) were packaged in Mongolia, but were not substantially transformed into a different product. Customs regulations (19 CFR 10.176(a)(2)) preclude the toy farm set from benefiting from GSP.

The regulations also allow for sets of articles to qualify under GSP if the third-country article is of “de minimis” value. Because the farm animals made in China accounted for 18% of the total value (\$1.75 of \$9.95), the de minimis exception could not apply.

Note: The outcome would be the same if the farm animals were of U.S. origin or from any country other than Mongolia.
